Founder and Director at Xtremity Prosthetics and Orthotics Dubai |  
Consultant Orthotist (Sports Injury) @ UPANDRUNNING Medical  
Center LLC | Executive Management, Executive Team  
Dubai, United Arab Emirates

## Summary

I am Consultant Prosthetist and Orthotist and the Founder and Director of Xtremity Prosthetics & Orthotics. Based in Dubai, with more than a decade of experience, I work at the intersection of patient care, digital technology, and business development—helping translate complex rehabilitation needs into personalized solutions and sustainable service models. My clinical background spans pediatric and adult orthotics, sports biomechanics, custom foot orthoses, cranial remoulding, scoliosis bracing, and lower-limb prosthetics. Working directly with patients has shaped my approach to innovation: every technology must ultimately serve a clinical purpose. Better fit, greater comfort, improved function, and a more consistent patient experience remain the measures that matter. At Xtremity, I am building a vision for digitally connected prosthetic and orthotic care, bringing together clinical assessment, gait and plantar-pressure analysis, 3D scanning, CAD/CAM, and additive manufacturing. Our ambition is to strengthen local design and manufacturing capabilities while making specialist expertise more accessible to hospitals, orthopedic centers, rehabilitation providers, and clinical partners. My strategic focus is on developing pathways for AI-assisted design, greater workflow automation, and more connected clinical and manufacturing systems. These capabilities can help address a central challenge in our field: how to deliver highly individualized devices with the consistency, efficiency, and reach required for sustainable growth. As a clinician and business leader, I connect the requirements of patient care with the practical realities of service delivery, team development, manufacturing, and commercial growth. My role extends beyond individual device provision to building multidisciplinary relationships, developing hospital partnerships, and identifying opportunities for integrated prosthetic and orthotic services. I am particularly interested in models that allow healthcare organizations to expand their capabilities through specialist support, shared expertise, and

efficient access to digital design and production. With Dubai as a base and a broader focus on the UAE, India, and the MENA region, I am interested in partnerships that strengthen regional manufacturing, develop clinical networks, and support thoughtful expansion. If you are investing in healthcare innovation, expanding an orthopedic or rehabilitation service, or developing technology for personalized medical devices, I welcome a conversation about what we can build together

---

## Experience

### UPANDRUNNING Medical Center LLC

Consultant orthotist(sports Injury).
